Himanga Nimesh

I'm a self-driven full-stack JavaScript developer with a solid foundation from the Institute of Technology, University of Moratuwa. My expertise spans web and mobile development, complemented by a flair for UI/UX design. With a proactive attitude and a knack for problem-solving, I am excited to embark on new challenges.

  Anuruddha Kumara Nation School
  G.C.E Advanced Level - Physical Science Stream(2018)

Projects

DocsWell – Telzee

This is a platform to automate healthcare workflows. Through DocsWell's features patients can save money and time. I had implemented some features in frontend and backend in this project.

Technologies: Next JS , Nest JS, GraphQL, Mongo DB, AWS

Banty – Telzee

This is a unique platform to deliver healthcare through technology. This has got virtual clinic as well. In this project I have done lot of bug fixing in backend. Also I have added some features to the backend as well. Then I have done some researches for this project as well.

Technologies: React JS , Node JS, Mongo DB, Firebase, TypeScript, Jitsi Meet, Saga, AWS

Banty Mobile – Telzee

This is the mobile application of Banty In this project I have implemented some features in frontend and backend. Also had fixed some bugs as well.

Technologies: React Native , Node JS, Mongo DB, Firebase, Jitsi Meet, AWS

SkillGate - Telzee

SkillGate is an online training for employees. Organization can use this product for train their employees. I had implemented some features in this project in fronend and backend.

Technologies: Next Js, Node JS, Mongo DB, AWS

University Projects

Final Project: Group Communication platform for ITUM

We have planned to do an inter-university communication platform to inform them about events, and communicate with student groups with special features, job opportunities, and many more. I was the leader of the this group project and I have done UI designing, developing front end and back end.

Technologies: Flutter, Firebase

Fuel queues management website and app

This was developed to manage fuel queues in fuel stations. Station owners and people can register and make work easier.

Technologies: Next JS, Flutter, Node JS, MongoDB

Volunteering

- Video editor university media club.
- Video editor at Mora Hiking Club.
